

Special Instructions for International Shipment of Samples

For shipping purposes, natural gas samples are considered as “dangerous goods.” Restrictions vary from country to country and from shipping company to shipping company. Please check with the express shipping companies and air freight companies in your area to see which will accept dangerous goods for shipment to the US.

IMPORTANT NOTICE:

ISOTECH/WEATHERFORD DOES NOT DO BUSINESS OR RENDER SERVICES FOR THE DIRECT OR INDIRECT BENEFIT OF CUBA, IRAN, NORTH KOREA, SUDAN, OR SYRIA, OR A NATIONAL OF THESE COUNTRIES. SAMPLES FROM THESE COUNTRIES OR RELATED TO OPERATIONS OWNED OR CONTROLLED BY ANY ENTITY FROM THESE COUNTRIES WILL BE REJECTED.

For expedited and assured delivery, do not mail your samples.

International shipment of natural gas is controlled by the “Dangerous Goods Regulations” of the “International Air Transport Association” (IATA). To assist you in shipping the samples we have enclosed the warning labels which IATA requires. Include with the shipment the following items:

- **Original Bill of Lading**
- **Commercial Invoice**
- **Shipper’s Declaration for Dangerous Goods**
- **Packing List**

To expedite the processing of your samples, also sign a copy of the “Toxic Substances Control Act Statement” attached and include it with the shipping papers. **Please note that all documents must be emailed to DLUSWFTLABSIMPORTS@weatherford.com, Weatherford.docs@dhl.com PRIOR to shipping.**

Please arrange all shipments with an International Freight Forwarder (e.g. Panalpina, DHL, Kuehne & Nagel) or a courier service (e.g. DHL Express or FedEx) when shipping samples to the U.S.

Notify Party

DHL Global Forwarding
19120 Kenswick Drive
Humble, TX 77338
U.S.A.
Weatherford.docs@dhl.com
Direct Tel: +1-281-964-2620

Consignee

Isotech Laboratories, Inc.
1308 Parkland Court
Champaign, IL 61821
U.S.A.
Tel: (217) 398-3490
Fax: (217) 398-3493

Airport of Destination Chicago, IL (ORD)

Emergency Telephone Number

As required by the Department of Transportation (49CFR - Part 172, Subpart G, §172.604) a person who offers a hazardous material for transportation must provide an emergency response telephone number, including the area code or international access code, for use in the event of an emergency involving hazardous material. You **MUST** use your company’s emergency response telephone number. If one is not available to you, please contact us and we can advise you on how to obtain one.

Commercial invoice must include the following information:

- Shipper name/address/contact info
- Consignee name/address/contact info (This should be designated as Isotech)
- Commercial invoice number
- Detailed description
 - o The following must be included with the description: “Geological (Rock, Core, or Soil**) sample for analysis only.” To expedite customs clearance, add the sampling depth for rock and soil samples.
 - o The following must be included with the descriptions of oil/gas samples: “Geological (Sweet Oil, Sour Oil***, Gas, or Sour Gas***) sample for analysis only.”
- Value of sample
 - o Value of sample must be determined by the Customer, and include the value of mineral sample and cost of packaging. If the customer determines that the value of the mineral sample is nil, the declared value of the sample at minimum must include the value of packaging.
 - o The following note must be added for all rock, core, soil**, or oil samples: “Geological Rock/Soil/Oil sample for analysis only. Value for Custom purposes only.”
- Harmonized tariff code (line-item specific)
 - o If you need guidance determining the harmonized tariff code, you may contact Weatherford Labs Trade Compliance Group at DLUSWFTLABSIMPORTS@weatherford.com for assistance.
- Country of origin* = Country in which the sample was taken.

*Samples without the country of origin will be delayed upon arrival to the U.S. The shipment will be held until the information is provided. All additional charges will be billed to the customer.

**If you are providing “soil” samples, with “soil” being defined as the top 10 feet of earth, this will require the shipment to be fumigated and the fumigation certs will need to be provided.

***Sour gas/oil would be a sample that does or could contain Hydrogen Sulfide. **Please note that Isotech does not accept samples containing Hydrogen Sulfide (H₂S; sour gas).**

HAZMAT SHIPPING

Please ensure that all Hazardous Material (HAZMAT) shipments are properly packed and labeled per IATA/IMDG/DOT regulations depending on the mode of transportation. Once packed and the Shipper’s Declaration for Dangerous Goods has been completed by a HAZMAT certified person/company, please include a copy of this document with your pre-alert. If for any reason you have a question if an item is HAZMAT, please contact either your freight forwarder or the Weatherford Labs Trade Compliance Team, and provide them a copy of the MSDS and a detailed description of the goods and they will advise if it is HAZMAT. Please **do not** mix HAZMAT in the same packaging.

- H₂S gas
- Oil or oil that could contain H₂S
- Compressed gas
- Gas cylinders (empty or full)
- Chemicals

Trade and Logistics Questions

If you have any additional question about shipping to the U.S. or any other region for Isotech or Weatherford Labs, please contact our Global Trade Compliance and Logistics Manager via email at ryan.payne@weatherford.com.

Toxic Substances Control Act Statement

I certify that all the chemical substances in this shipment comply with all applicable rules or orders under TSCA and that I am not offering a chemical substance for entry in violation of TSCA or any applicable rule or order thereunder
